(3) Change in Key Accounting Data and Financial Indicators and Reason

—Applicable Not Applicable

Note: If the above-mentioned major accounting data and financial indicators of a listed company show an increase or decrease of more than 30% as compared with the end of the previous year in respect of balance sheet items and an increase or decrease of more than 30% as compared with the corresponding period of the previous year in respect of profit statement items, the change(s) and the main reason(s) shall be explained.

1. Balance sheet items

Currency: RMB Unit: Yuan

Item	At the end of the Reporting Period	At the end of the last year	Year-on-year increase/decrease	Reason for change
Accounts payable	537,885,101.63	385,786,645.07	39.43%	Mainly due to the increase in the purchase of raw materials during the Reporting Period

2. Income statement items

Currency: RMB Unit: Yuan

Item	The Reporting Period	Same period of last year	Year-on-year increase/decrease	Reason for change
Operating revenue	1,910,323,745.74	1,267,876,796.45	50.67%	Mainly due to the increase in revenue from the finished dose pharmaceutical products business, heparin sodium and low molecular weight heparin API business during the Reporting Period

Item	The Reporting Period	Same Period Last Year	Year-on-year increase/decrease	Reason for change
Operating costs	1,331,158,955.65	849,901,135.30	56.63%	Mainly due to the growth in sales during the Reporting Period
Selling expenses	120,294,534.92	88,667,593.46	35.67%	Mainly due to the increase in marketing expense during the Reporting Period
Credit impairment loss	9,663,241.63	2,349,062.54	311.37%	Mainly due to the increase in the expected credit loss at the end of the Reporting Period
Other gains	10,886,831.42	4,806,270.12	126.51%	Mainly due to the year-on-year increase in government subsidies received during the Reporting Period
Investment income	30,599,687.00	32,393,930.46	194.46%	Mainly due to the increase in investment loss recognized from long-term equity investments accounted for under the equity method during the Reporting Period
Gains on fair value changes	60,878,216.44	8,700,641.03	599.70%	Mainly due to the year-on-year increase in gains on fair value changes of financial assets during the Reporting Period
Operating profit	283,490,135.32	182,256,245.68	55.54%	Mainly due to the increase in gross profit during the Reporting Period
Non-operating income	858,367.03	188,708.99	354.86%	Mainly due to the increase in expenditure on external donations during the Reporting Period
Total profit	282,649,084.92	182,086,074.08	55.23%	Please refer to the analysis of reasons for changes in operating profit
Net profit	235,239,208.83	142,677,904.44	64.87%	Please refer to the analysis of reasons for changes in operating profit

Item	The Reporting Period	Same Period Last Year	Year-on-year increase/decrease	Reason for change
Other comprehensive income, net of tax	¥ 4,532,878.12	7,983,011.63	¥ 156.78%	Mainly due to joint effect of fluctuations in international exchange rates and the fair value changes of investments in other equity during the Reporting Period

3. Cash flow items

Currency: RMB Unit: Yuan

Item	The Reporting Period	Same Period Last Year	Year-on-year increase/decrease	Reason for change
Net cash flows from operating activities	¥ 1,378,827.28	419,806,687.16	¥ 100.33%	Mainly due to the year-on-year increase in cash paid on the purchase of goods and services was greater than the year-on-year increase in cash received from the sale of goods and rendering of services during the Reporting Period
Net cash flows from investing activities	¥ 88,020,516.24	297,313,031.90	¥ 129.61%	Mainly due to the year-on-year increase in the net amount of time deposits transferred by the Company for cash management and the year-on-year increase in the net cash paid for purchases of wealth management products during the Reporting Period
Net cash flows from financing activities	616,763,600.63	72,788,524.98	747.34%	Mainly due to the year-on-year increase in net corporate borrowing during the Reporting Period
Effect of fluctuations in exchange rates on cash and cash equivalents	¥ 9,741,485.63	¥ 20,528,526.49	¥ 52.55%	Mainly due to the fluctuations in international exchange rates during the Reporting Period

BUSINESS REVIEW

In 2022, China's pharmaceutical and medical industry is still in an important stage of development and transformation. The impact of the COVID-19 pandemic still exists and severe challenges coexist with opportunities for innovation and internationalization. During the period under review, the rapid spread of Omicron virus variant resulted in recurrent COVID-19 outbreaks worldwide. The pandemic continues to exacerbate supply chain tensions and the impact of inflation, further hindering global economic growth. The global economy is still facing many uncertainties this year. During the period under review, the Russia-Ukraine conflict had a significant global impact, with consumer and business confidence in the Euro zone declining in the first quarter of 2022, international financial markets reacting sharply, and international currency markets showing significant turbulence. During the period under review, the Group actively cooperated with different pandemic prevention policies, including different levels of quarantine measures and restrictions, and actively fulfilled its social responsibilities to demonstrate the corporate responsibility. Efforts were made to prevent and control the pandemic along with strengthened safety management. These measures affected the Group's production activities in Shenzhen. However, the pandemic did not have a significant impact on the Group's sales and operating income.

Leveraging the Group's expertise and experience in global pharmaceutical supply, the Group maintained a positive momentum in 2022, with the sales of finished dose pharmaceutical products continuing to grow at a rapid pace and the active pharmaceutical ingredient (API) business demonstrating a two-pronged approach, while CDMO growth continued. At the production and operation level, we will continue to enhance our supply chain management, promote the synergistic production of products within the Group and concentrate on our core production lines, thereby improving the quality of the production of finished dose pharmaceutical products and APIs. At the same time, the Group further strengthened its sales development as well as its overseas sales capabilities to expand its sales scale and enhance its profitability.

During the Reporting Period, the Group achieved sales revenue of RMB1,910.3 million (the same period of last year: RMB1,267.9 million) and gross profit of RMB579.2 million (the same period of last year: RMB418.0 million). During the Reporting Period, the Group recorded net profit attributable to shareholders of the parent of RMB234.9 million (the same period of last year: RMB143.5 million), adjusted net profit attributable to shareholders of the parent (net of the effect of structural foreign exchange gains and losses) of RMB261.1 million (the same period of last year: RMB173.8 million) and net profit net of extraordinary gains and losses of RMB165.8 million (the same period of last year: RMB114.5 million).

Heparin Industrial Chain Business

During the Reporting Period, the Group's heparin industrial chain business achieved sales revenue of RMB1,674.2 million (the same period of last year: RMB1,071.8 million). Sales revenue from finished dose pharmaceutical products accounted for 46.3% (the same period of last year: 38.3%) and sales revenue from API accounted for 53.7% (the same period of last year: 61.7%) of the revenue from the heparin industrial chain business. The Group has been actively promoting the high-quality transformation of the heparin industrial chain, firmly pushing forward the integration of the global vertical industrial chain, relying on excellent product quality and a strong sales platform, and aiming to become a new leader in the global heparin finished doses industry.

During the Reporting Period, finished dose enoxaparin sodium pharmaceutical products performed strongly with sales revenue of approximately RMB775.7 million, representing an increase of 88.9% over RMB410.6 million in the same period of last year. Europe is a key market for the Group's finished dose pharmaceutical products business. In the face of the Russia-Ukraine conflict, which led to the outbreak of conflicts and accumulated risks in the European systems, there were significant fluctuations in the Euro, which posed certain challenges to the Group's sales in Europe. Benefiting from the solid sales in recent years, the Group has laid a foundation in various regional markets in Europe. The Group continued to promote a differentiated sales model in its core regions to further increase its market share to offset the negative impact of the European market. On the other hand, the Group has improved operational efficiency and expanded its sales scale through channel integration management. In addition, the Group actively seized the opportunity to further accelerate the expansion of new markets and continued to expand its influence in different regions. During the Reporting Period, the Group's sales volume in Europe continued to gain momentum with a 40.6% increase. Sales volume in the U.S. market grew by 3,027.7% through both partnership and proprietary sales models, mainly due to a relatively low base sales figures in the first quarter in the same period of last year. Sales growth in non-European and U.S. markets was also promising, with sales volume growth of 229.2% in the first quarter of 2022. Sales in China also showed growth momentum, with volume growth of 199.2% as compared to the same period of last year.

During the Reporting Period, sales of heparin API business amounted to approximately RMB898.5 million (the same period of last year: RMB661.2 million), representing an increase of 35.9% over the same period of last year. During the period under review, the heparin API business was back on a steady upward trajectory with stable but improving operating efficiency. On the one hand, the Group actively promoted the order and supply of heparin sodium APIs, scheduled production and supply according to the demand of customers, and sales resumed in an orderly manner; on the other hand, the Group continued to strengthen the development of enoxaparin APIs and maintained sales growth, which became an additional growth driver of the heparin API business.

CDMO Business

During the Reporting Period, sales of CDMO business amounted to approximately RMB201.9 million (the same period of last year: RMB151.3 million). During the Reporting Period, the Group's CDMO business was mainly driven by Cytovance. Benefiting from Cytovance's accurate market insight and business development capabilities, as well as its high quality delivery record based on excellent research and development (R&D), operation and project management capabilities, Cytovance's revenue maintained growth with a 17.5% revenue growth, of which service revenue maintained a 26.2% growth. During the Reporting Period, we actively continued to expand horizontally and vertically on the basis of the orders of our core products, and we stepped up our efforts to explore customer resources. Leveraging our international CDMO technical team and business development team, we have been following up on potential customer projects to increase the number of CDMO projects at each stage.

OUTLOOK

In 2022, in addition to the fifth wave of the COVID-19 outbreak threatening global health and severely impacting the economy, the outbreak of regional conflicts in Europe and sanctions imposed by European and U.S. countries will have an impact on world trade, commodity prices, and oil supply. Along with geopolitical tensions between China and the U.S. and rising U.S. dollar interest rates due to inflation, all of these have added lots of uncertainties to the global economic recovery. At the same time, it will continue to affect the performance of different industries to varying degrees. The Group has achieved sales growth in the first quarter to demonstrate its ability to effectively cope with and overcome volatile operating conditions, and we will keep our eyes on the goals and deliver on them in the coming period.

In 2022, the Group will continue to be steadfast in its determination to achieve a steady increase in sales volume in its core business while seizing the opportunity to realize a significant improvement in results through more favorable crude product prices. We will further strengthen internal synergies and unite our efforts to fully unleash our production capacity and marketing synergies. We will accelerate the construction of our financial and human resources sharing center and the digitalization transformation of our marketing strategy, optimize the supporting system for organizational development, and comprehensively refine our business and management standards. At the same time, through collaboration with our partners around the world, we will implement the objectives of each synergy project and enhance our profitability with the advantages of scale and efficiency. In addition, we will strive to improve the efficiency and management of our global supply chain, continue to improve quality and optimize costs, building a stable and reliable supply chain security system. We will also adhere to our international market strategy, and on top of the European, U.S. and non-European and the U.S. markets, we will actively open up the Chinese market to fully support the normalization of centralized procurement. Lastly, we will actively strengthen our R&D capabilities and continue to facilitate the Group's expansion in the field of innovative drugs through the introduction of synergistic models to connect with global innovative drug development and promote future commercialization.

Under the changing business environment, the Group will develop rationally with constant review into the external environment, exploring opportunities with better allocation of resources and taking actions in a timely manner. The Group will respond to the changes in the industry development with effective enhancement of its own mechanism, platform, products and services, and more actively promote high-quality development.
